

Mt. Shasta Spring Water Company, Inc.

Mt. Shasta Spring Water Company has been providing natural spring water to our customers in northern California and southern Oregon since 1988. Our spring water is drawn from our protected springs at the base of Mt. Shasta, an area known worldwide for having some of the best tasting, purest, natural sources of spring water. Geologists tell us our spring water originates from glaciers high atop Mt.

Shasta. The water flows through miles of volcanic rock to springs located on our property at the base of the mountain where it is captured and bottled for your enjoyment.

All of our representatives are thoroughly trained on how to take care of your needs, and of course, we always give service with a smile. We know our success depends on your satisfaction.

For more information please call us at 530-246-8800.
